

AI Menu Chatbot

An AI-powered restaurant menu assistant with built-in QR code generator. Customers scan a QR code → chat with AI → get instant menu answers.

Project Structure

```
restaurant-ai/  
|  
├─ app.py           ← Main chatbot app  
├─ menu.txt         ← Restaurant menu data (edit this!)  
├─ requirements.txt ← Python packages needed  
└─ README.md        ← This file
```

Setup Instructions

Step 1 — Install packages

```
pip install -r requirements.txt
```

Step 2 — Add your API key

```
# On Mac/Linux  
export ANTHROPIC_API_KEY="your-api-key-here"  
  
# On Windows  
set ANTHROPIC_API_KEY="your-api-key-here"
```

Get your free API key at: <https://console.anthropic.com>

Step 3 — Edit the menu

Open `menu.txt` and replace with the real restaurant's menu.

Step 4 — Run locally

```
streamlit run app.py
```

Your browser will open at <http://localhost:8501>

Deploy Online (Free)

1. Push this folder to GitHub
2. Go to <https://share.streamlit.io>
3. Connect your GitHub repo
4. In Secrets settings, add:

```
ANTHROPIC_API_KEY = "your-api-key-here"
```

5. Deploy — you'll get a public URL!
-

Generate QR Code

1. After deploying, copy your Streamlit URL
 2. Open the app → sidebar → paste URL → click Generate QR Code
 3. Download the PNG and print it for the restaurant
-

Pricing Guide

Package	Price
Basic digital menu	₹1,500 one-time
AI Chatbot setup	₹4,000 + ₹800/month
Premium package	₹8,000 + ₹1,500/month

How to Customize for Each Restaurant

1. Replace `menu.txt` with the restaurant's actual menu
 2. Change the default `restaurant_name` in `app.py` (line 44)
 3. Deploy a new Streamlit app per restaurant
 4. Generate a unique QR code for each
-

Built with  using Python, Streamlit, and Claude AI
